APPLICATION

COURT CLERK'S OFFICE - TULSA
CORPORATION COMMISSION
OF OKLAHOMA

COMES NOW Applicant and shows the Honorable Corporation Commission as follows:

1. Parties: Applicant is Newfield Exploration Mid-Continent Inc., One Williams Center, Suite 1900, Tulsa, Oklahoma 74172, who is the owner of oil and gas leasehold interests within the lands described in the caption hereof. The parties being named as respondents to this Application are listed on Exhibit "A" attached hereto and made a part hereof.

2. Allegation of Facts:

2.1 Section 27, Township 16 North, Range 9 West, Kingfisher County, Oklahoma has been established as a 640-acre horizontal drilling and spacing unit for the Mississippian (less Chester) and Woodford common sources of supply by **Order No. 640729 as confirmed by 642780**. For the Mississippian (less Chester) common source of supply such order requires that the completion interval of a horizontal well drilled in a horizontal well unit shall be located not less than 660 feet from the unit boundary. For the Woodford common source of supply such order requires that the completion interval of a horizontal well drilled in a horizontal well unit shall be located not less than 165 from any north/south unit boundary and not less than 330 feet from any east/west unit boundary.

2.2 Section 34, Township 16 North, Range 9 West, Kingfisher County, Oklahoma will be established as a 640-acre horizontal drilling and spacing unit for the Mississippian (less Chester) and Woodford common sources of supply by **order to issue in Cause CD No. 201504381-T**. For the Mississippian (less Chester) common source of supply such order shall require that the completion interval of a horizontal well drilled in a horizontal well unit shall be located not less than 660 feet from the unit boundary. For the Woodford common source of supply such order shall require that the completion interval of a horizontal well drilled in a horizontal well unit shall be located not less than 165 from any north/south unit boundary and not less than 330 feet from any east/west unit boundary.

71 OIL&GAS/TRAN/PUM APP

2.3 The Meramec portion of the Mississippian (less Chester) common source of supply has shale like properties. The Woodford common source of supply in the lands covered hereby is located immediately below the Mississippian (less Chester) common source of supply. The Woodford common source of supply may be inadvertently encountered in the drilling of the lateral of a horizontal well in the lands involved herein in the Meramec portion of the Mississippian (less Chester) common source of supply when such well drills out of or exits such shale like reservoir. The Woodford separate common source of supply is an Associated Common Source of Supply under 52 O.S. §87.6 in regard to the Meramec portion of the Mississippian (less Chester) common source of supply. The two separate common sources of supply covered hereby constitute a Targeted Reservoir under 52 O.S. §87.6.

2.4 Applicant has conducted a diligent and meaningful search of the local county assessor's records, county treasurer's records, and county deed records regarding the property involved for return addresses on recorded instruments, county probate records and city and county telephone directories and other sources of such information to locate each respondent and has made a bona fide effort to reach an agreement as to the development of the unit with each respondent located by such search.

2.5 Applicant, as operator, is proposing to drill a multiunit horizontal well in the lands involved herein in the Targeted Reservoir, with a portion of the completion interval of such multiunit horizontal well to be located in one or more of the 640-acre horizontal drilling and spacing units formed for the separate common sources of supply involved herein in said Sections 27 and 34. Applicant is proposing to drill the multiunit horizontal well involved herein at the following location:

SURFACE HOLE LOCATION: NO CLOSER THAN 150 FEET FROM THE SOUTH LINE AND NO CLOSER THAN 2,000 FEET FROM THE EAST LINE OF SECTION 34, TOWNSHIP 16 NORTH, RANGE 9 WEST, KINGFISHER COUNTY, OKLAHOMA

LOCATION OF WELLBORE (LATERAL) AT SECTION 34 COMPLETION INTERVAL: THE PROPOSED LOCATION OF THE END POINTS OF THE COMPLETION INTERVAL WILL BE NO CLOSER THAN 0 FEET FROM THE NORTH LINE AND NO CLOSER THAN 165 FEET FROM THE SOUTH LINE AND NO CLOSER THAN 2,000 FEET FROM THE EAST LINE OF SECTION 34, TOWNSHIP 16 NORTH, RANGE 9 WEST, KINGFISHER COUNTY, OKLAHOMA

LOCATION OF WELLBORE (LATERAL) AT SECTION 27
COMPLETION INTERVAL: THE PROPOSED LOCATION OF THE END POINTS OF THE COMPLETION INTERVAL WILL BE NO CLOSER THAN 0 FEET FROM THE SOUTH LINE AND NO CLOSER THAN 165 FEET FROM THE NORTH LINE AND NO CLOSER THAN 2,000 FEET FROM THE EAST LINE OF SECTION 27, TOWNSHIP 16 NORTH, RANGE 9 WEST, KINGFISHER COUNTY, OKLAHOMA

That the entire length of the lateral will be cemented such that the perforations will be isolated from the beginning and end point of the lateral.

2.6 The Commission should allocate to each of the affected units covered hereby the reasonable drilling, completion and production costs associated with the multiunit horizontal well involved herein and the commingled production and proceeds from the completion interval of such multiunit horizontal well. Based upon the information now available, Applicant is proposing that the allocation factor for each of the affected units involved herein should be determined by dividing the length of the completion interval of the multiunit horizontal well involved herein located in each such affected unit by the entire length of the completion interval of such multiunit horizontal well. In the event the lateral of the multiunit horizontal well involved herein stays within the productive portion of the Mississippian (less Chester) common source of supply throughout the drilling of such lateral, then Applicant anticipates that **approximately 50% of the completion interval of such multiunit horizontal well will be located in Section 34 and approximately 50% of such completion interval will be located in Section 27** with the cost of and the production and proceeds from such multiunit horizontal to be allocated between the affected units involved herein based on such percentages. The actual allocation of such costs, production and proceeds may vary depending upon the results of the multiunit horizontal well involved herein.

2.7 Attached hereto as Exhibit "B" and made a part hereof is a map showing the location of each currently existing well in each of the affected units covered hereby and the approximate anticipated location of the proposed multiunit horizontal well involved herein. Within the area in and around the lands covered hereby, there have been very few horizontal wells drilled within the Mississippian (less Chester) common source of supply and therefore, the nature and quality, including the potential productivity, of such common source of supply is not known. The results of the multiunit horizontal well involved herein will provide significant information concerning the nature and quality of the Mississippian (less Chester) common source of supply in the lands covered hereby which will be used to determine whether any other horizontal wells are necessary within the lands involved herein for the full and efficient development and operation of the Targeted Reservoir covered hereby within the affected units involved herein. If the multiunit horizontal well involved herein is successfully drilled and if the results of such multiunit horizontal well are significant and if the price of natural gas is favorable, Applicant may potentially drill additional multiunit horizontal wells in the affected units covered hereby if such additional wells are approved by the Commission upon the filing of a proper application therefore at a future date.

2.8 That the proposed well, at the location requested by Applicant, is necessary to effectively and efficiently drain a portion of the common sources of supply (reservoir) covered by the drilling and spacing unit comprised of the land set out in Paragraph 4 hereof, which cannot be adequately and efficiently drained by a well drilled at the permitted well location prescribed in the orders listed in said Paragraphs 2.1 and 2.2.

2.9 In order to prevent waste, to protect correlative rights and to aid in the full and efficient development of each of the affected units covered hereby, the Commission should approve the multiunit horizontal well involved herein, including establishing the applicable allocation factor for allocating the cost of and the production and proceeds from such multiunit horizontal well to each of the affected units covered hereby.

2.10 That Applicant has filed Spacing Cause CD No. 201504381-T, Location Exception Cause CD No. 201504383-T, Exception to OAC 165:10-3-28 Cause CD No. 201504384-T, Pooling Cause CD No. 201504385-T.

3. Legal Authority: The relief sought by this application is authorized by House Bill 1909, to be codified as 52 Okla. Stat. § 87.6 et seq., and OAC 165:5-7-6.2 and OAC 165:10-3-28.

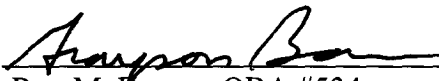

4. Relief Sought: Applicant requests that the Corporation Commission of Oklahoma enter an order, to be effective as of the date of the execution thereof or as of a date prior thereto, as follows:

4.1 Approving a multiunit horizontal well in the 640-acre horizontal drilling and spacing units formed for the Mississippian (less Chester) and Woodford separate common sources of supply in Sections 27 and 34, Township 16 North, Range 9 West, Kingfisher County, Oklahoma so as to allow such multiunit horizontal well to be drilled as described in Paragraph 2.5 above and to be completed in and to produce hydrocarbons from the above-named separate common sources of supply and establishing of a proper allocation factor for allocating the cost of and the production and proceeds from such multiunit horizontal well to each of the affected units covered hereby.

4.2 Granting such other and further relief as may be proper based upon the evidence presented at the hearing herein. The legal descriptions of the land sections adjacent to the area within which the location exception lies are Sections 21, 22, 23, 26, 28, 33 and 35, Township 16 North, Range 9 West and Sections 2, 3 and 4, Township 15 North, Range 9 West, all in Kingfisher County, Oklahoma. Applicant further requests that Applicant or some other party be authorized the right to drill said well. Applicant further requests that it be permitted to produce said well at said location from all common sources of supply covered hereby without any downward allowable adjustment.

Respectfully submitted,

BARNES LAW, PLLC

Continent Inc.

CERTIFICATE OF MAILING/CERTIFICATE OF SERVICE

The undersigned, of lawful age, being first duly sworn upon oath, states: I am the Attorney for the above-named Applicant. I certify that on or before the 14th day of September, 2015 I mailed by first class United States mail, proper postage prepaid thereon, a copy of the Notice of Hearing on file in this Cause and this Application to the respondents named on the Exhibit "A" attached to this Application, at their respective mailing addresses.

That Applicant has, with due diligence and after inquiry of every possible source for information, attempted to locate the names and addresses of all respondents that should be receiving notice of this hearing before the Corporation Commission. For respondents that Applicant does not know and cannot ascertain whether an individual respondent(s) are living or deceased, or respondent(s) with a last known address that are no longer deliverable, or whether a corporation(s) or other business entities respondent(s) are existing, Applicant desires to obtain service by publication upon said respondents whose addresses are unknown or are undeliverable.

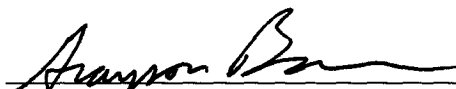

Ron M. Barnes, OBA #534
Grayson M. Barnes, OBA #31475
