APPLICATION

COURT CLERK'S OFFICE - TULSA
CORPORATION COMMISSION

COMES NOW Applicant and shows the Corporation Commission of Oklahoma as follows:

1. **PARTIES:** Applicant is **Newfield Exploration Mid-Continent Inc., One Williams Center, Suite 1900, Tulsa, OK 74172**, the owner of oil and gas leasehold interests within the lands described in the caption hereof. The name and address of each party entitled to notice of this Application is as shown on Exhibit "A".

2. **ALLEGATION OF FACTS:**

(A) That the land described in Paragraph 4 has been established as a drilling and spacing unit for each of the common sources of supply also named in said Paragraph 4; the orders listed in Paragraph 4 prescribe a well location for the drilling and spacing unit and the common sources of supply covered by this Application, which well location, in the opinion of Applicant, is not, when taking into consideration all of the presently known conditions, proper for the drilling and spacing unit and common sources of supply covered hereby. That to prevent waste and protect correlative rights the Commission should prescribe another well location for such drilling and spacing unit and common sources of supply.

(B) That the proposed well, at the location requested by Applicant, is necessary to effectively and efficiently drain a portion of the common sources of supply (reservoir) covered by the drilling and spacing unit comprised of the land set out in Paragraph 4, which cannot be adequately and efficiently drained by a well drilled at the permitted well location prescribed in the orders listed in said Paragraph 4.

3. **LEGAL AUTHORITY:** 52 Okla. Stat. § 87.1.

4. **RELIEF SOUGHT:** Applicant requests that the Commission enter an order amending an order to issue in a companion spacing application for the Mississippian and Woodford common sources of supply, to permit a well for such common sources of supply at the following location:

SURFACE LOCATION: Will be specified in the order to issue in this cause.

LOCATION OF WELLBORE AT COMPLETION INTERVAL: The proposed location of the end points of the completion interval will be no closer than 165 feet
